

Pyae Sone Thant Kyaw

Aspiring Software Developer

Address Bangkok Thailand

Phone (+66) 0610525441

E-mail

pyaesonethantkyaw205@gmail.com

A 22 years old dynamic Master's student in Computer Science with a strong passion for problem-solving, algorithms, and software development. Proficient in Android and Web development, committed to creating practical solutions while exploring emerging technologies.

Work Experience

2025-03 - Current

Freelance Android Developer

- Develop custom Android applications using Kotlin and Java, adhering to MVVM architecture and clean code principles using Jetpack Compose or View.
- Integrate Firebase, REST APIs, and third-party libraries.
- Design responsive UIs following Material Design.
- Collaborate remotely with clients to deliver tailored solutions.

Education

Expected in 2027-08

Master of Science: Computer Science

Mahidol University - Thailand

2025-02

Bachelor of Science: Computer Systems Engineering

University of Sunderland - United Kingdom

GPA: First Class Honour

Skills

Programming Languages: Java, Kotlin, Python, JavaScript, Dart, SQL

Frontend Development: React.js, HTML, CSS, Tailwind CSS, Bootstrap

Backend Development: FastAPI, Spring Boot, RESTful APIs, Authentication & Authorization

Mobile Development: Android (Kotlin), Jetpack Compose, Flutter, MVVM, Clean Architecture

Data Science & Analytics: Pandas, NumPy, Scikit-learn, Data Visualization, Feature Engineering, Hypothesis Testing, Machine Learning, Statistical Analysis

Tools & Technologies: GitHub, Firebase, Postman, SonarQube, Figma

Databases: MongoDB, MySQL, SQLite

Cloud & DevOps: Docker, Docker Compose, Linux (Ubuntu), Nginx, GitHub Actions (CI/CD), DigitalOcean

Projects

Bangkok Transit – Public Railway Transportation Platform

- Developed responsive UI for a map-based railway navigation and trip planning platform.
- Integrated frontend components with backend APIs to display routes and station information.
- Collaborated on UI/UX design and backend API integration.

Cake Store App

- Built an Android e-commerce application for browsing and purchasing cakes.
- Implemented authentication, cart management, checkout, and order tracking features.
- Utilized Firebase, Coroutines, StateFlow, and Koin for scalable architecture.

Expense Tracker

- Developed a personal finance application for tracking income, expenses, and budgets.
- Implemented local data persistence and user preference management.
- Created budgeting and analytics features with reactive UI updates.

Student Performance Analysis Using Machine Learning & Statistical Testing

- Analyzed student laboratory and examination performance data to identify factors influencing academic outcomes.
- Performed data cleaning, feature engineering, and hypothesis testing on educational datasets.
- Developed machine learning models to predict student performance and evaluate key predictors.
- Visualized trends and insights to support data-driven educational decision-making.

Secure Authentication

- Developed a security-focused Android application with advanced authentication mechanisms.

- Implemented password hashing, email verification, OTP-based 2FA, and bot protection.
- Enhanced account security through password validation and login timeout controls.

TechDebt-Hotspot

- Built a dashboard for identifying technical debt hotspots in GitHub repositories.
- Combined code churn, maintenance issues, and code smell findings into actionable insights.
- Visualized maintainability metrics to support engineering decisions.

Line Follower Autonomous Garbage Truck

- Led development of an IoT-enabled robotic waste collection system.
- Implemented line-following navigation, obstacle detection, and automated waste collection.
- Enabled remote monitoring and control through the Blynk platform.
